

These are two case studies using the Celluma light therapy for wound healing on Mode setting #2 above for 3 (3 minute) treatments over 4 weeks on a flap-slice wound on horse's face. Note the lack of scar tissue formation.

The second study in with a 30-year-old female with persistent acne. She self applied 4 light treatments (30-minutes each) over 4 weeks with the Celluma light therapy using Mode #1 for skin/acne conditions. The results are impressive.
